Education

Murdoch University
Undergraduate for
Computer Science, and
Games Technology
(2024 – Present)
GPA: 3.6 out of 4.0

Churchlands Senior
High School
(Graduated 2023)
ATAR: 94

Profile

Accomplished university student currently studying Computer Science and Games Technology, who aspires to work in a professional software engineering team. Passionate about building high-quality solutions, learning new technologies, and contributing to teams that deliver impactful digital experiences.

Skills

- Proficient in C, C++, and Java.
- Experience with Python, C#, HTML, and JavaScript
- Skilled in creating and delivering quality products per requirements
- Strong understanding of design patterns, software architecture, and data structures
- Skilled in problem solving and designing solutions in response to technical and user requirements

Accomplishments

- Two letters of Commendation from Murdoch University for Outstanding Unit Results
- Completed Cisco Certified Support Technician (CCST) Cybersecurity (2025)
- Completed Certificate IV in Business (2023)
- Awarded WACE Certificate of Merit (2023)
- Achieved High Distinctions in multiple units for Computer Science and Games Technology

Industry-Related Experience

- **AI Minesweeper Solver in Python**
Developed AI using CSP solving and probabilistic inference
Written in Python using Google OR-Tools library
Available at: <https://github.com/kaybradsell/Minesweeper-AI>
- **Billiards in C using FFP OpenGL**
Team project for unit 'Computer Graphics Principles and Programming'
Achieved a High Distinction for the unit and assignment
Implemented model loading, lighting, ball and cue physics
- **Fishing Game in C++ with FFP OpenGL**
Team project for university unit 'Games Design and Programming'

Achieved a High Distinction for the unit and assignment

Developed model loading, OBB collision generation, game data storage and reading, finite state machine, and input handling

- **Weekly Magazine Back-End in Java**

Individual project for university unit 'Software Architecture'

Written in Java to load in user data, subscriptions, payment details, and provide weekly emails to the customer

To be expanded to use JavaFX for a UI

Available at: <https://github.com/kaybradsell/Magazine-System>

- **3D Game Engine in C++ using OpenGL 3.3 Core Profile**

Team project for university unit 'Advanced Game Engine Design and Programming'

Implemented a graphics API façade, window API, Entity Component System, and model loading

Applied factory patterns and software design principles

- **Serious Game in VR for Australian Federal Police in Unity**

Team project for university unit 'Virtual Realities and Game Development'

Collaborated with client to design a Moot Court in VR

Demonstrated stakeholder management, iterative development

Work Experience

- **Murdoch University Student IT Help Desk** (Feb. 2025 – Jun. 2025)

Troubleshooted technology-related issues and provided support to clients

Collaborated effectively with team members

Documented all support tickets

Proposed and implemented improvements to the IT Help Desk operations

- **Coles Cashier and Supervisor** (Nov. 2023 – Present)

Managed customer interactions and supervised team operations

Provided basic technical support to customers and coworkers

Applied quick problem-solving skills to resolve issues efficiently
